### **Iberian conference on hydrogeology pictures**

The aim of the conference was to have a meeting point to share different experiences and news of the research and demonstrative projects on hydrogeology carried out by Spanish hydrogeologists and researchers on this area (hydrogeology).

The event was divided in several sessions. DESSIN presentation took place in the session of **Managed Aquifer Recharge**, the first day of the conference in the plenary session.

Marta Hernández presented the first results DESSIN WA4 group obtained in the preliminary tasks, comparing the water quality of pre-potable water in Sant Joan Despí WWTP with previous experiences worldwide
